## A New Sett of Correct MAPPS.

By *Charles Price* and *John Senex*, Geographers to the Queen.

**T**HE more Knowing part of Mankind is sufficiently convinc'd of the Excellency and Use of *Geography*; And that the necessity of understanding it, by all who have but the least Concern in the Affairs of the World; is, in a manner unavoidable. But the great Discoveries and Improvements, made of late, both by Sea and Land, by several deservedly Eminent Persons, do abundantly evince, that in the *Geographical* Descriptions hitherto given, in most Mapps, the Places are laid down, some 20 Degr. some 30 Degr. and some above 40 Degrees, more *East* or *West*, and others several Degrees more *South* or *North*, than really they shou'd be: And therefore, that Men may reap the Benefit of such useful Discoveries, and of the many curious Observations, so carefully made, and gain a clear and just Idea of the due Situation and Position of all the known Parts of the Earth; We design to Publish a New Sett of Mapps, which shall, in Correctness, and all other Particulars, far exceed any yet done: For, besides all the Places being laid down with the utmost Accuracy, according to the Best, Latest, and most Approv'd Observations and Calculations, both in *Latitude* and *Longitude*, so as to appear Distinct and Natural; the Graduations, and Scales perform'd with all possible Exactness; many very considerable Additions and Alterations shall be made, to render them really Just and Compleat. And that they mayn't only be Instructive and Useful, but likewise Graceful, and every way Pleasing to the Eye; they shall be Adorn'd, in a peculiar manner, with very Beautiful and Agreeable Compartments, and all most curiously Engrav'd by the best Masters.

But 'tis well known, that Undertakings of this Nature, are very Chargeable; therefore, 'tis desir'd, that all Gentlemen, who are willing to Encourage a Work so very useful and necessary, will be pleas'd to Subscribe to these

### CONDITIONS.
